Bill,

My next deadline is Tuesday afternoon (4/30).

Thanks.

Suzanne

Mr. Franklin,

I'm a reporter for the news service Inside EPA, and have been following the Hunters Point cleanup for a while. I was wondering if I could obtain a copy of a Navy letter dated March 15, 2019, to EPA that relates to the Hunter Point site's Five-Year Review and work plan.

Also, could you tell me if the Navy has responded to an EPA letter dated April 11, 2019 from EPA Region 9 Superfund Division Director Enrique Manzanilla to Laura Duchnak, BRAC director for the Navy? This relates to the Five-Year Review and Parcel G Work Plan. If the Navy has responded, could I obtain a copy of that? Also, did the Navy meet with EPA on April 15, as the April 11 letter proposes? If so, what was discussed and what was the outcome? Could you tell me if the Navy is continuing to pursue using RESRAD, rather than EPA's PRG calculator, for different aspects of the site? If so, what are the advantages of using RESRAD?

I can be reached at the email or number below. Thanks very much.
